

MeiG-MA922

Auto-Grade 5G R16+C-V2X Module

Integrated CPU(~20K DMIPS)

MeiG MA922 series are based on Qualcomm’s latest second-generation Snapdragon® automotive 5G modem and RF platform, which support 3GPP Release 16 standard, 5G NR SA and NSA while compatible with 4G/3G/2G network and frequency band from mainstream countries worldwide. It integrates multi-core CPU with a maximum computing power of 20K DMIPS. The module support optional C-V2X functions using ITS 5.9GHz frequency band, capable of direct communication via PC5 Mode4. In addition, it also has GNSS service, which can support L1+L5, QDR, PPE and data fixes, and owns rich interfaces such as PCIe 3.0, USB 2.0 & 3.1, SDIO, I2S, SPI, I2C, UART, PCM, ADC, (U)SIM, RGMII/SGMII, ADC, GPIO.

MA922 series modules can provide safe and reliable auto solutions, which can be widely used in TBOX, TCU, C-V2X, OBU, RSU and other automotive related products.

The internal chip of MA922 complies with AEC-Q100 standards and are developed and manufactured in strict accordance with IATF16949:2016 automotive industry quality management system standards, and have an ultra-wide work temperature range, which can withstand the test of harsh automotive application environment and maintain stable and efficient communication performance.

Main Advantage:

- ✓ Based on Qualcomm SA522M(AEC-Q100)
- ✓ Automotive-grade 5G NR Release 16 module
- ✓ Built-in ARM Cortex-A55 multi-core CPU (~20K DMIPS)
- ✓ C-V2X PC5 Mode 4 direct communication(R14/15/16*)
- ✓ L1+L5, PPE, QDR3 etc.
- ✓ Support eCall/NG-eCall in normal operation under +105°C
- ✓ Rich peripheral interfaces(SDIO, PCIe, RGMII/SGMII, etc.)
- ✓ Support ultra-wide temperature: -40°C~85°C
- ✓ Comply with IATF16949 auto industry quality management system

Function Description

eCall/NG-eCall	Support	
PCIe with external BT/WIFI Module	Support	
PPE (RTK)	Support	Optional
QDR3	Support	Optional
Echo cancellation/noise suppression	Support	
Short message	Support	

Electrical Feature

Work voltage	4.75V~5.25V	Typical value: 5.0V
--------------	-------------	---------------------

Antenna Interface

Main antenna	1	
Diversity antenna	1	
MIMO antenna	2	
C-V2X antenna	2	
GNSS antenna	1	
DSDA antenna	2	

Other Interface

SIM	2	
SDIO	2	DSRC interface or eMMC v5.1
PCIe	2	External BT/WIFI interface
USB	1	USB 3.1 Gen2 compatible with USB 2.0
UART	4	2 support hardware flow control
Debug UART	1	Baud rate: 115200(default)
SPI	2	
I2C	2	
I2S	2	
PCM	1	
RGMI/SGMII/USXGMII	1	USXGMII support 2.5Gbps
ADC	3	
GPIO	15	

Optional Configuration

CPU	10K DMIPS	Default
	15K DMIPS	Optional
	20K DMIPS	Optional
Flash	8Gb+8Gb MCP(nand+LPDDR4x)	Default
	4Gb+4Gb MCP(nand+LPDDR4x)	Optional
	16Gb+16Gb MCP(nand+LPDDR4x)	Optional
GNSS	L1+L5	Default
	L1	Optional
	NO	Optional
C-V2X	NO	Default
	Support	Optional

Temperature Range

Work temperature	-35°C ~ +75°C
Extension temperature	-40°C ~ +85°C
eCall work temperature	-40°C ~ +105°C
Storage temperature	-40°C ~ +95°C

Package

Size	54.5 mm × 53.0 mm × 3.45 mm
Package	LGA

Certification

Compulsory	CCC*/CE*/JATE*/TELEC*/FCC*
Operator	

* means in developing
